Example Corp | Credit Case

Q1 2025 - SYNTHETIC TRAINING DATA

Financial observations

TTM revenue: USD 2,400 million

Total debt at quarter-end: USD 1,500 million

TTM EBITDA: USD 400 million

TTM interest expense: USD 80 million

TTM window: 2024-04-01 through 2025-03-31.

Debt is a point-in-time balance at that window's ending quarter-end.

Amounts are USD millions. EBITDA is unadjusted; debt is gross debt.

Example Corp | Credit Case

Q2 2025 - SYNTHETIC TRAINING DATA

Financial observations

TTM revenue: USD 2,200 million

Total debt at quarter-end: USD 1,600 million

TTM EBITDA: USD 330 million

TTM interest expense: USD 95 million

TTM window: 2024-07-01 through 2025-06-30.

Debt is a point-in-time balance at that window's ending quarter-end.

Amounts are USD millions. EBITDA is unadjusted; debt is gross debt.

Synthetic management explanation

Management attributes the USD 70 million TTM EBITDA decline to:

- Lower customer volumes: USD 45 million reduction in EBITDA.
- Higher input costs not recovered in pricing: USD 25 million reduction.

The bridge reconciles prior TTM EBITDA of USD 400 million to USD 330 million.

Total debt increased by USD 100 million to fund working capital.

These statements and all financial amounts are synthetic training data.
